XM radio has filled a void in our lives. We travel across the US many times a month and were constantly tuning in stations, only to hear stuff that we didn't enjoy. We love XM, we hear news, weather, music, comedy, sports or other material that we truly enjoy. We can change stations and fill our lives with worthwhile material. Please, please, please don't limit our ability to choose what we hear. We have 1st amendment rights to say what we want, we should also be able to hear what we want to hear. If we--the public--did not want or like it, there would not be funding and use to bring this up! The quality of XM is better than any BOSE radio. We love it and do not want to lose it. Thanks for letting us have our say.
